Outbound Mobility Industry Intelligence Survey

April 2020

Introduction

As part of CISAustralia's industry engagement strategy, we wanted to learn more about where each of our Australian University Partners are in terms of outbound mobility and what plans institutions have in place for the next 6 months when it comes to dealing with COVID-19.

A second survey will be sent later in the year to build on these results, analyse what has changed (if anything), and to benchmark institutional feedback. The aim will be to assist Universities in knowing what other institutions across Australia are doing or considering across mobility when it comes to COVID-19 planning.

In April 2020, CISAustralia developed a set of indicators for our partner universities to provide data to be shared anonymously and confidentially with those participating institutions. The results of this initiative may be used for the purpose of advancing shared knowledge across our partner institutions in regards to the impact of COVID-19 on outbound mobility.

This data will also enable CISAustralia to better support you, your students and your institution moving forward.

Thank you all for your participation and strong interest. Please contact CISAustralia with any questions.

Results

The following slides contain summarised data from the Outbound Mobility Industry Intelligence survey sent 16th April 2020. The survey was sent to 29 Australian Universities. The Universities were selected because each institution is a formal partner and has a formal written agreement with CISaustralia.

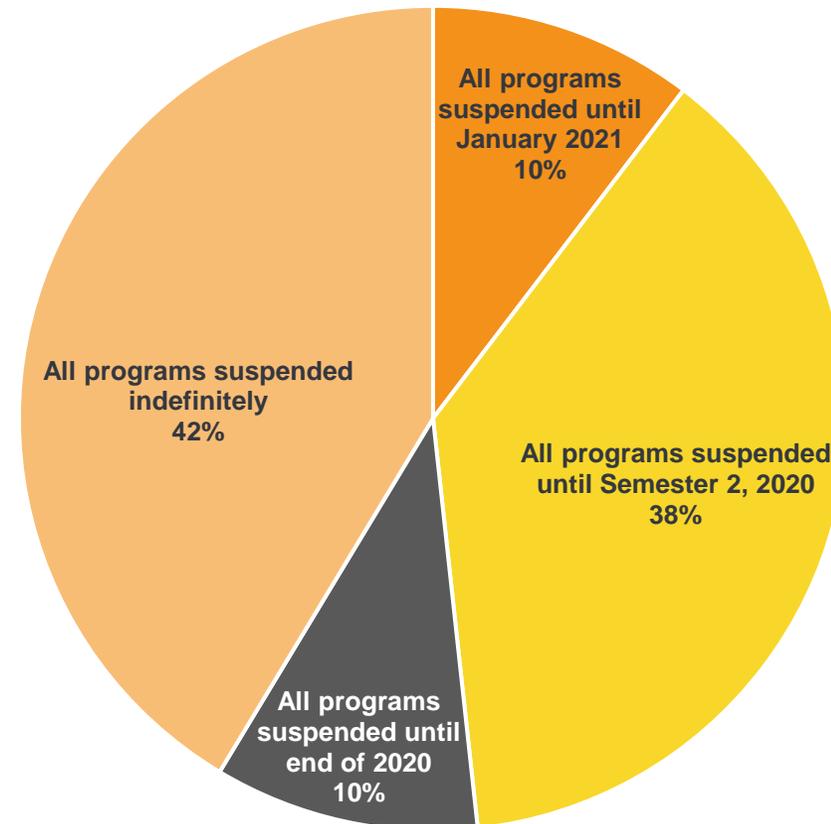

This survey data is confidential to our institutional partners. Please contact CISaustralia directly if you would like to discuss.
